What are quests?

A quest is an educational outdoor game that combines elements of fun and learning, treasure hunting and the joy of discovery.

Quests - Explorers' Expeditions are outdoor games involving treasure hunting. They do not require any service or marking, so, unlike paper chases or city games, they can be played almost anytime. The basis of the game is to follow the quest route. There are already over 1,200 such outdoor quests in our base (the largest in Poland). All you need to play is a leaflet or the Quests – Explorers' Expeditions mobile app.

Leaflets are available at selected tourist information points or as a downloadable file from the Questy.org.pl website. Reading the rhyming clues, the participant follows the quest route and learns the secrets of a given place. At the end of the trail, explorers will find a „treasure” – a final container with a commemorative stamp and a quest logbook. The stamp and entry in the logbook confirm that the route has been completed.

In addition to outdoor quests, we also create virtual quests.

VIRTUAL QUEST – sit down at your computer and experience a virtual educational adventure!

A virtual quest is not part of a video game. Poetic clues and riddles await you. 'Krakow. Treasures of the Night' is a journey through time and space via Krakow.pl film recordings from 2025 showing the most interesting nighttime attractions and events in Krakow.

While watching the magnificent shots of Krakow at night and answering rhyming riddles, you will learn where and when it is worth being in Krakow after dark.

Have fun!
