What are quests?

A quest is an educational outdoor game that combines elements of fun and learning, treasure hunting and the joy of discovery.

Quests - Explorers' Expeditions are outdoor games involving treasure hunting. They do not require any service or marking, so, unlike paper chases or city games, they can be played almost anytime. The basis of the game is to follow the quest route. There are already over 1,200 such outdoor quests in our base (the largest in Poland). All you need to play is a leaflet or the Quests - Explorers' Expeditions mobile app.

Leaflets are available at selected tourist information points as a downloadable file from the [Questy.org.pl](https://questy.org.pl) website. Reading the rhyming clues, the participant follows the quest route and learns the secrets of a given place. At the end of the trail, explorers will find a „treasure” – a final container with a commemorative stamp and a quest logbook. The stamp and entry in the logbook confirm that the route has been completed.

In addition to outdoor quests, we also create virtual quests.

VIRTUAL QUEST – sit down at your computer and embark on a virtual educational adventure!

Rhyming clues and riddles await you, and the path to the treasure leads through websites, including Google Street View panoramas.

From your computer screen, you will learn what every resident of Krakow and every visitor should know, even if they are afraid to ask.

Do you park city scooter in the right place?

You're an ace!

Can you find Krakow's marvels far from the city centre?

You may be other tourists mentor!

Do you make sure you consume alcohol legally?

We will treat you regally!

Do you protect the world's cleanest city against littering?

You're a king!
