It should just work automagically

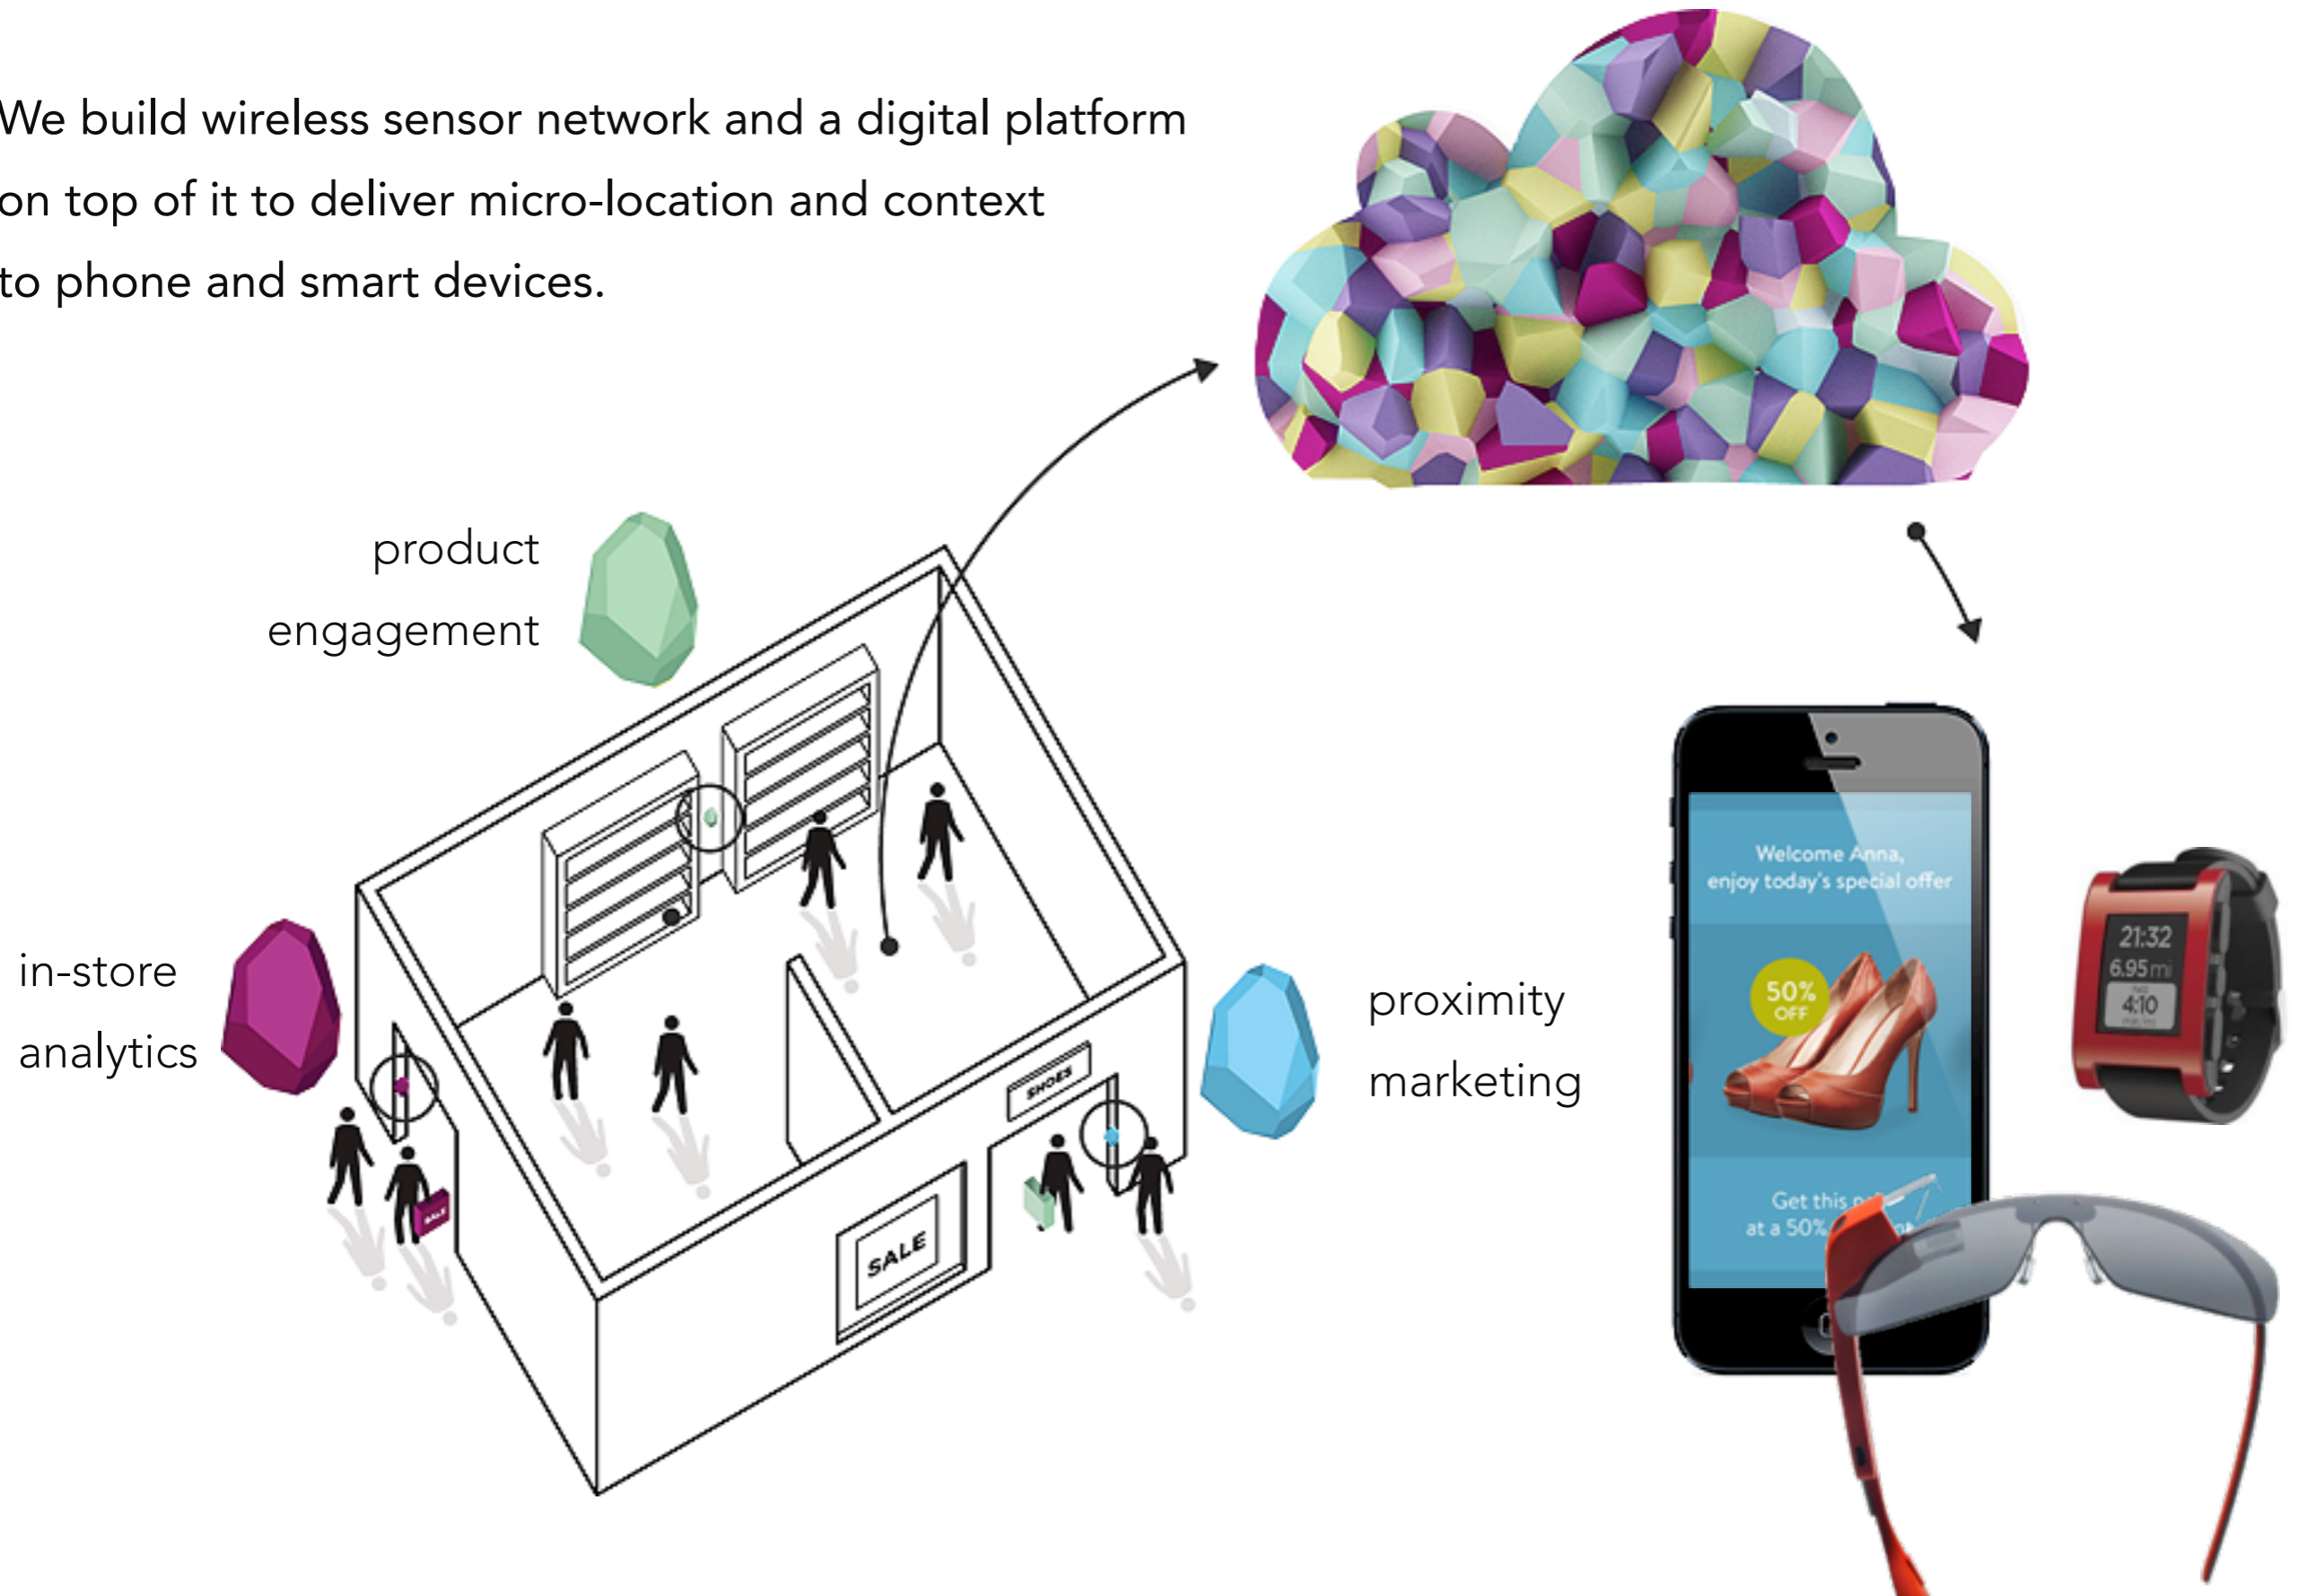

Estimote Beacons

patent pending

Micro-location and context

We build wireless sensor network and a digital platform on top of it to deliver micro-location and context to phone and smart devices.

Welcome Anna,
enjoy today's special offer

API and the ecosystem growth

confidential

We are focused on retail, but thanks to our API we have enabled other industries to pre-order our beacons and build on top of our API.

The team in Mountain View and Kraków
